Hey Alan, thanks for the call. Your price on \$3000 gallons of 70/30 Winter Blend dyed diesel would be \$2.9881 per gallon.

Heading into winter you may want to drop some tank dry in your tank to take care of any possible moisture issues from condensation over the summer. We can include this at no charge in the fuel drop if you would like.

Let me know if you need anything else.

Thanks again

DJ
